PROFESSIONAL SUMMARY

Motivated first-year Computer Science Engineering student skilled in frontend development, Java, Python, and software engineering fundamentals. Delivered 4 full-stack projects, completed a software development internship, and solved 130+ LeetCode problems. Proficient in HTML5, CSS3, JavaScript, Git, and OOP; passionate about building responsive, user-centered web applications and continuously expanding technical expertise.

EDUCATION

B.E. Computer Science & Engineering | Prince Dr. K. Vasudevan College of Engg. & Tech., Chennai *CGPA: 8.0 | Expected: 2029*
Higher Secondary (Class XII) | Sree Venkateshwarar Matric. Hr. Sec. School *87.167%*

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML5, CSS3

Frontend: Responsive Web Design, Dashboard Development, UI/UX Principles, Chart.js, Glassmorphism Design

Tools: Git, GitHub, Figma, VS Code

Concepts: OOP, Data Structures, Software Engineering, MVC Architecture, Machine Learning Basics

Professional: Problem Solving, Team Collaboration, Communication, Project Planning

PROJECTS

FIND-ER – Smart Campus Lost & Found Portal *HTML | CSS | JavaScript*

- Developed a campus portal with Student & Admin Dashboards, authentication, search, filtering, and recovery tracking.
- Engineered a responsive, mobile-first UI with modular components; improved item recovery efficiency campus-wide.

Spendly – Expense Management Platform *HTML | CSS | JavaScript | Chart.js*

- Built a SaaS-inspired finance dashboard with Chart.js analytics, budget tracking, and goal monitoring.
- Delivered glassmorphism-styled responsive UI with client-side transaction management and real-time calculations.

Hotel Reservation System *Java | OOP | ArrayList*

- Built a Java console app applying encapsulation, inheritance, and polymorphism for room booking and cancellations.
- Designed an ArrayList-driven data layer supporting dynamic inventory, reservations, and availability queries.

Disease Prediction System *Python | Machine Learning*

- Developed a Python ML app predicting diseases from symptom data with preprocessing and feature engineering.
- Implemented an end-to-end ML pipeline covering data ingestion, model training, evaluation, and interpretation.

INTERNSHIP EXPERIENCE

Software Development Intern | CodeAlpha *Remote*

- Implemented Java and Python projects across the full SDLC, from requirement analysis through deployment and debugging.
- Delivered functional software modules with clean code architecture, strengthening readiness for collaborative engineering.

ACHIEVEMENTS

Solved 130+ LeetCode problems | NPTEL Elite Certification – OOP (79%) | Typewriting Junior & Senior Grade – First Class with Distinction

CERTIFICATIONS

NPTEL OOP (Elite) | freeCodeCamp Responsive Web Design | HackerRank Java | Infosys Springboard Java & Python | Udemy CSS3 | Scalar JavaScript | Accenture UX | TCS iON Communication | 13 Claude AI Certifications | Microsoft Applied Skills

LANGUAGES

English (Proficient) | Tamil (Native)
